Input Request

The image shows the Swagger UI interface for the API TaxCalculation v1. The endpoint selected is POST /api/Tax. The request body is set to application/json and contains the following JSON:

```
{  "municipalityName": "Vilnius",  "day": "2020.05.02"}
```

The interface includes a 'Cancel' button and a 'Reset' button. The Swagger logo and version 1.0 OAS3 are visible at the top.

Output Response

The image shows the Swagger UI interface displaying the output response for the POST /api/Tax endpoint. The response is a 200 status code with the following JSON body:

```
{  "municipality": "Vilnius",  "date": "2020.05.02",  "taxRule": "2",  "taxRate": 0.4}
```

The response headers are also displayed:

```
content-type: application/json; charset=utf-8
date: Tue, 12 Apr 2022 13:49:20 GMT
server: Microsoft-IIS/10.0
x-powered-by: ASP.NET
```

The interface includes a 'Download' button for the response body. The Swagger UI also shows the request URL and the curl command used to test the endpoint.
